

EVERY RIGHT ALONG THE LINE, SECURED.

We secure land rights for gas utility projects: easements and right-of-way widenings, temporary construction easements along the route, and the facility sites that go in beside the line.

■ WHAT WE HANDLE

- ✓ Project management & administration
- ✓ Title & ownership
- ✓ Right of way acquisition
- ✓ Construction support
- ✓ Routing & siting
- ✓ Survey & field support
- ✓ Non-environmental permitting
- ✓ Project closeout

■ HOW WE WORK

- ✓ **Start prepared:** ownership, requirements, documents, and strategy validated up front.
- ✓ **Every parcel has a path:** status and next action, always current.
- ✓ **No surprises:** clients informed, communities engaged, risks visible early.
- ✓ **Engaged through completion:** construction, restoration, closeout.

One quality standard

Your gas project gets the same compliance posture, the same estimate discipline, and the same reporting we put behind everything we run.

WHAT THE LINE NEEDS.

■ THE SCOPE

Every necessary right

Easements and right-of-way widenings, temporary construction easements along the route, and facility sites acquired beside the line.

Right-of-way widening

Existing right-of-way widened to the width the project specifies, with the record kept current behind it, parcel by parcel.

Facility sites

Regulator stations and the other sites that go in beside the line, acquired alongside the route with the same discipline.

Permits and notifications

We coordinate the permits, notifications, crossing agreements, and access that keep gas utility work moving on schedule.

■ KUDU • YOUR PROJECT RECORD

Kudu is Dudley's proprietary land management platform: every parcel's ownership, status, documents, and risks in one current record, from kickoff through restoration and closeout.
