

THE ROUTE IS SET. WE SECURE IT.

Because water and wastewater lines don't allow for turns, we secure the rights along the path your engineers need and keep the communities informed.

■ WHAT WE HANDLE

- ✓ Project management & administration
- ✓ Title & ownership
- ✓ Right of way acquisition
- ✓ Construction support
- ✓ Routing & siting
- ✓ Survey & field support
- ✓ Non-environmental permitting
- ✓ Project closeout

■ HOW WE WORK

- ✓ **Start prepared:** ownership, requirements, documents, and strategy validated up front.
- ✓ **Every parcel has a path:** status and next action, always current.
- ✓ **No surprises:** clients informed, communities engaged, risks visible early.
- ✓ **Engaged through completion:** construction, restoration, closeout.

Bring us in before the route is final

We review the alignment for ownership, access, and acquisition risk, and raise the red flags while the design can still respond. You lock in a route with less land risk.

THE LONG ROUTE AND THE LOCAL LINE.

■ TWO SCALES, ONE STANDARD

Large-diameter mains

We secure the rights for a 42- or 48-inch main from a lake or reservoir: full project discipline, one owner at a time, title through closeout.

Local service and relocations

We turn service lines and relocations around quickly: smaller footprints, faster agreements, and the same complete file on every parcel.

Whoever's building it

Municipalities, districts, utilities, and the infrastructure companies building for them: we coordinate with everyone at the table.

Established neighborhoods

We explain the work before it starts, keep a reachable contact through construction, and coordinate restoration until commitments are met.

■ KUDU · YOUR PROJECT RECORD

Kudu is Dudley's proprietary land management platform: every parcel's ownership, status, documents, and risks in one current record, from kickoff through restoration and closeout.
